

Foundations of ICT for Decision Makers

October 31 to November 4, 2022

Learn fundamental concepts of ICT and technology trends from experienced industry speakers and top EPFL professors during a 5-day course on EPFL campus

FOUNDATIONS OF ICT FOR DECISION MAKERS

organized in collaboration with Fondation Lombard Odier

Why this course?

Enhancing digital readiness is a logical next step on the drivers of philanthropic vitality, as well as sector rebuilding needs post-COVID-19.

The recent rise of cyberattacks against municipalities and charitable organisations, notably the International Committee of the Red Cross, also highlights the importance of digital literacy and preparedness.

The course aims to enable senior level participants of non-profit organizations to better engage digitally with beneficiaries and stakeholders, as well as better understand the opportunities and threats posed by digital technologies.

Course curriculum - 5 modules
