

# Should We Trust Digital Immunity Passports?

Wednesday, April 28th 2021, 16h - 18h CEST

There is much debate about the use of digital immunity passports as a response to the COVID-19 pandemic. Such digital tools to certify immunity could help spur economic recovery, but raise ethical and privacy concerns. How to build trust in such a solution? What elements make them interoperable among countries? How is people's data related to their immunity status governed? A panel of prominent specialists will discuss these and other questions from 4 different angles - ethical, business, political/governance and scientific - during a two-hour moderated discussion.

**Format** → Moderated panel discussion  
**Audience** → General public; no fees  
**Agenda** → **16h00 - 16h05** Welcome by C4DT's Academic Director, Jean-Pierre Hubaux, EPFL
